# Next Steps

**Data Representation** 

#### **Architectural**

#### **Domain**

## **Image Based Approach**

- Consistent data format for all planar mechanisms
- Intuitive approach to apply constraints
- Benefits of Data Bucketing
- Leverage Established Deep Learning Architectures

#### **GANs**

 Better Reconstruction Quality for Images

#### **Attribute Vectors**

 Better Manipulation of Inputs

#### **Attribute Vectors**

 Better Manipulation of Inputs

### **MultiDOF**

- Type Synthesis
- Workspace Specification

### Spatial Mechanisms

 Scaling the approach in three dimensions

# Image Based Approach

- 2D Array of Discretized Information
- Specify Information in an Intuitive Way
- lets you apply constraints which are hard to specify mathematically consistent manner
  - Ex. Restriction on Swept Volume
